We provide industrial pneumatic vibrators designed for external fixing of concrete formwork, hoppers and instances where high frequency vibration is required.

Engineered to last the distance

Pneuvibe formwork vibrators are built to work in the harshest environments. They are constructed from high quality hardened ground steel and designed to withstand the harshest treatments. All models are easy to maintain and are backed by comprehensive after sales service and spare parts.

Our external vibrators are bearing-less, with only two moving components creating centrifugal forces, making for a highly reliable and durable piece of equipment.

PNEUVIBE Vibrators are
manufactured in Australia

SPECIFICATIONS

FIXED MOUNTING	FB750	FB1200	FB1600	FB3500	FB6000
QUICK RELEASE	QR750	QR1200	QR1600	QR3500	QR6000
Centrifugal Force (n)	7,340	11,743	15,500	36,253	57,827
Frequency (rpm)	13,000	15,000	16,000	15,200	14,500
Amplitude (mm)	1.19	1.59	1.6	1.98	3.18
Air Consumption (l/s)	19	19	19	27	31
Weight (kg)	8.6	9.1	9.1	15.2	15.5
